

Q&A Regarding Schwab's Money Market Fund Holdings

for select securities as of October 1, 2008

We can state categorically that Schwab money market funds continue to maintain a \$1.00 net asset value. Our funds hold high-quality securities. Our two priorities in managing these funds are to maintain the \$1.00 net asset value and meet the daily liquidity needs of our clients.

Schwab money market funds continue to meet all redemption requests.

Schwab has both taxable and municipal money market funds, and the following questions and answers address both.

U.S. Treasury's Temporary Guarantee Program

Q: Will Schwab money market funds participate in the U.S. Treasury's Temporary Guarantee Program for Money Market Funds?

A: All Schwab money market funds will participate in the recently announced U.S. Treasury Temporary Guarantee Program. The U.S. Dollar Liquid Assets Fund is not eligible to participate in the Treasury Guarantee Program because it is not a U.S. based money fund.

Rule 2a-7

Q: What is Rule 2a-7?

A: Rule 2a-7 money market funds invest only in high-quality money market instruments that present minimal credit risk, meet strict diversification requirements, and mature in 13 months or less. The portfolio must maintain a weighted average maturity of 90 days or less. By complying with these strict requirements, money market funds seek to maintain a stable net asset value of \$1.00 per share and provide daily liquidity to investors.

All Schwab money market funds are actively managed to be Rule 2a-7 compliant.
